

José Manrique Cruz

Tech Lead / Senior Backend Engineer

Bogotá, Colombia | +57 310 872 0605 | jmanriquecruz@gmail.com | linkedin.com/in/jmanriquec | jmanriquecruz.github.io/personal-website

SUMMARY

Systems Engineer with 10+ years of experience in backend software development using .NET and C#, including 4+ years leading development teams. Experience across banking, insurance, food industry, education, and IT management services. Strong track record applying Clean Architecture, SOLID principles, and design patterns to build robust, scalable, and maintainable backend services and APIs within agile methodologies. Skilled at translating business needs into clear technical decisions, supporting teams through mentoring, code review, and technical standard-setting.

TECHNICAL STACK

Languages & Frameworks: C#, .NET / .NET Core, ASP.NET Web API, WCF, Entity Framework, WPF, Angular, JavaScript, Java / Spring Boot (adaptable)

Containers & Orchestration: Docker, Kubernetes

CI/CD & DevOps: Azure DevOps, Git, CI/CD pipelines, Prometheus / Grafana

Data & Infrastructure: SQL Server, MongoDB, Oracle, PostgreSQL, Azure, RabbitMQ

Architecture & Practices: Clean Architecture, SOLID, Design Patterns, Microservices, Distributed architectures, AI-assisted development

Security & Authentication: OAuth 2.0, JSON Web Token (JWT), OpenID Connect

Automation & Data: Selenium (test automation), Python / Pandas (data handling and analysis)

EXPERIENCE

Tech Lead / Senior Backend Engineer

Jan 2025 – Present

Sistran Andina — Bogotá, Colombia

- Design and evolution of backend architectures for insurance systems, applying Clean Architecture, separation of concerns, and design patterns.
- Technical leadership: defining standards, code review, and mentoring developers toward maintainable, scalable solutions.
- Active participation in architectural technical decisions alongside business stakeholders.
- Working with .NET, C#, SQL Server, and integration systems in functionally high-criticality environments.

Backend Developer

Jul 2021 – Jan 2025

Aranda Software — Bogotá, Colombia

- Development and partial design of products within the architecture area.
- Implementation of SNMP Discovery: built an agent for device discovery using SNMP v2/v3, SSH, ICMP, and NetBIOS.
- Integration of Oesis Client SDK: developed a library implementing the Oesis framework.
- Prometheus Monitoring: built an API to manage the configuration file, including global configuration, targets, and alerts.
- Service management agent for AlertManager and Prometheus, for device monitoring, alert management, and metric-tracking agents.
- Developed the MIB Browser application and integrated discovery into the ADM product.
- Built compilation pipelines and artifact delivery (Azure DevOps).
- Technologies: .NET Core, Docker, Prometheus, Grafana, Azure DevOps.

Senior Backend Engineer

Feb 2017 – Jun 2021

Sistran Andina — Bogotá, Colombia

- Migration and integration of Claims, Payments, and Reinsurance modules.

- Managed SISS ETL and SQL Server 2008/2016, C#, RabbitMQ.
- Developed and implemented bulk auto-policy upload modules for PREVISORA and AXA COLPATRIA.
- Developed the home and civil-liability insurance issuance module for AXA COLPATRIA.
- Implemented reinsurance and claims processes for Seguros del Estado.
- Coordinated development activities and requirement tracking with the team.

Development Coordinator

Jun 2015 – Oct 2015

Infoguia.com — Caracas, Venezuela

- Coordinated the advertising and sales system project.
- Migrated the database from SQL Server to PostgreSQL.
- Led information-gathering meetings with the marketing team and assigned tasks to the development team.
- Technologies: PHP, Yii Framework.

Junior Analyst → Senior Development Engineer → Development Coordinator

Feb 2012 – May 2015

Medinet Consultores — Caracas, Venezuela

- 3-year progression within the company: started as a junior developer, advanced to senior development engineer, and finished as development coordinator.
- Projects: administrative system for Colegio Santiago León de Caracas, Bancaribe Curaçao website, interface with the SINCRO system, and SGC/CEL (online commerce) for Telefónica Venezuela.
- Migrated databases from SQL Server to PostgreSQL; developed packages and stored procedures in Oracle.
- As coordinator: deliverable planning, task assignment, production deployment, and post-production support.
- Technologies: C# .NET Web Forms, PHP (Yii Framework), SQL Server, Oracle, PostgreSQL.

EDUCATION

B.S. in Computer/Information Engineering

Universidad Nacional Experimental del Táchira — Venezuela (2011)

CERTIFICATIONS & COURSES

- Cloud101 (Jul 2026)
- Diploma in Software Architecture — Universidad de La Sabana (Feb 2026)
- AI-050T00 — Develop Generative AI Solutions with Azure OpenAI Service
- AZ-204 — Developing Solutions for Microsoft Azure (2026)
- Diploma in Software Engineering
- Introduction to Software Engineering (edX)
- Git and GitHub (Platzi)
- Microsoft 70486 — Developing ASP.NET MVC Web Applications
- Microsoft 70487 — Developing Microsoft Azure and Web Services
- CCNA Cisco Networking Level 1 (UNET)
- Public Speaking Course — Universidad Experimental del Táchira

LANGUAGES

Spanish — Native

English — Intermediate (B1), actively improving

Currently enrolled in an English program — ETS Academy, Nashville, Tennessee (tlc.tennessee.edu)

CORE SKILLS

Technical Leadership • Teamwork • Problem Solving • Decision Making • Conflict Management • Stakeholder Communication • Adaptability
